

Nguyen Thanh Tai

BRIDGE SOFTWARE ENGINEER

INFORMATION

M 0981667547
10/09/2003
@ thanhtai10903@gmail.com
Quận 9, TP Hồ Chí Minh

EDUCATION

FPT University 09/2021 - present
Software Engineering
Data Structures & Algorithms, Object-Oriented Programming (OOP)

SKILL

PROGRAMMING LANGUAGES

Java, JavaScript

FRAMEWORKS & RUNTIMES

React, Spring Boot, Next.js, Node.

AI & DATA PROCESSING

AI & LLM Integration, OCR, NLP

DATABASES

PostgreSQL, My SQL, SQL Server

TOOLS

IntelliJ IDEA, AWS, Git, Docker, Jira

LANGUAGES

Japanese: N3

CAREER OBJECTIVE

My short-term goal is to develop strong backend skills, especially with Spring Boot, to become a professional backend developer.
My long-term goal is to achieve a Tech Lead position, leading large technology projects and building scalable, secure distributed systems.

WORK EXPERIENCE

FPT Japan Academy 01/2025 - 04/2025
Japanese Intern
• Improve your Japanese language skills
• Learn about Japanese culture

PROJECTS

Fan Shop 09/2025 - 01/2026
BACK-END DEVELOPER
• **Authentication & Cloud Integration:** Integrated Firebase & Google Cloud to implement secure Google Sign-In.
• **Real-time Chat System:** Developed a Real-time Chat System to enable instant communication between Admins and Users, significantly improving customer support responsiveness.
• **Order Management:** Engineered complex Order Status Logic and implemented real-time data synchronization between the Admin Dashboard (Web) and User App (Mobile).

Koi Express 09/2024 - 12/2024
BACK-END DEVELOPER
• **Dynamic Pricing Engine:** Engineered a complex dynamic pricing algorithm using Spring Boot, automating cost calculations based on weight and distance variables to optimize revenue strategies.
• **Cloud Storage Integration:** Integrated AWS S3 for scalable media storage, optimizing database performance and ensuring high-speed asset retrieval for the user interface
• **Security & Authentication:** Enhanced platform security by implementing multi-factor authentication (OTP via Twilio) and Spring Security with JWT architecture.
• **Real-time Communication:** Built a secure Real-time Chat System using WebSocket (STOMP), enabling instant connectivity between customers and support staff.

Quizmate AI 01/2026 - present
BACK-END DEVELOPER
• **AI Quiz Generation System:** Designed and developed an AI-powered system to automatically generate quizzes from multiple learning materials (PDFs, images, audio, video, URLs) using NLP, OCR, and LLM models (GPT/LLaMA/Mistral).
• **RESTful API Development:** Built high-performance RESTful APIs to support Web and Mobile applications, including material management, quiz generation, and group collaboration.
• **Real-time & Voice Interaction:** Integrated AI voice features (TTS, STT) to enable interactive, real-time quiz experiences.
