Overview of JUnit Testing

Mocking with JUnit

Java Testing: An
Introduction to TDD

Parameterized and Dynamic
Testing in JUnit

Jun 21, 2024

NGUYEN THANH TAI

has successfully completed the online Specialization

Java Testing

In this Specialization, learners developed essential skills for today's dynamic workforce, including essential techniques for testing Java code, Test Driven Development, Parameterized Tests, Dynamic Tests, without writing extensive test scripts. This Specialization also focused on building and enhancing Enterprise Applications, a test-first approach to developing Java artifacts, foundational Mocking, and Junit, ensuring all essential techniques for testing Java code were covered. Learners utilized a lab environment to test and create on their own to utilize their new skills.

Grayson Ivers,
Instructor

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
